**Status Report**

Carberry, Airport Manager, gave an update on the status for the TWY A/Fire truck Project. The TWY A rehabilitation/Fire Truck acquisition will be bid in April.

Twy A is in the design stages. The FAA has new design criteria which will require that Twy A be narrowed to 50-foot width. This narrowing will be helped by the design of a new fillet design instead of the traditional radius intersection design.

Carberry, Airport Manager, gave an update on the Preliminary Design of the N.E. Taxi lane. Chuck Larson and Kent Atkin from JUB gave an overview of the planning project and worked with the Board to define the goals. The Preliminary Design project for the future N.E. Taxi lane will include a public “Open House” in the terminal building Tuesday, December 6 from 4:00-7:00 PM in order help the project team develop a preferred solution. The utility planning will be an outgrowth of the taxi lane planning in the N.E. area.
